

# AKASH KUMAR SINGH

(.NET Full Stack Developer)

8081979898 | [singh.ak20185@gmail.com](mailto:singh.ak20185@gmail.com) | [linkedin.com/in/akashsingh-dev/](https://www.linkedin.com/in/akashsingh-dev/) | <https://github.com/AkashSingh1309>

## Summary

.NET Full Stack Developer with 2+ years of experience building enterprise applications using C#, ASP.NET Core, Blazor, Web API, SignalR, Dapper, and SQL Server. Delivered production systems across ERP, real-time gaming, and AI-integrated platforms with measurable gains in performance, security, and scalability. Actively expanding into Microsoft Azure.

## Technical Skills

**Programming & Frameworks:** ASP .NET Core, ASP .NET MVC , .NET Framework , Blazor, ADO.NET, SignalR, C#, Middleware, Micro-services.

**Web Technologies:** HTML,CSS,JavaScript

**Database & APIs:** Entity Framework Core, Dapper, ADO.NET, SQL Server, MySQL, Stored Procedures, REST API

**Cloud & Ops:** Microsoft Azure (AZ-900 in progress), IIS, Git, GitHub, Docker, CI/CD

**Architecture:**RESTful API Design, Microservices, RBAC, Real-Time Systems, Offline-First / Bulk Sync

**Tools:** Visual Studio, JIRA, Postman, Agile/Scrum, Performance Optimization, OpenAI API

## Experience

### V3M Technologies

Aug 2024 - Present

Software Engineer (.NET Full Stack Developer)

Gurugram, India

- Architected and executed a **multilingual** ERP system for an eye hospital, supporting usage **across multiple** global regions.
- Designed and developed **scalable RESTful APIs for cross-platform clients, enabling bulk data synchronization and offline-first architecture.**
- Engineered secure image processing workflows with lossless compression, reducing image size by 85%.**
- Streamlined secure, single-procedure data synchronization architecture across multiple tables, **reducing code complexity by 50% and increasing synchronization speed by 20%.**
- Developed a role-based access control (RBAC) system to manage page-level access and dynamic menu visibility.**
- Enhanced garbage collection and object lifecycle management to improve application **performance by 20%** and **reduce memory usage by 30%.**

## Projects

### Optical Inventory Management System (Shroff Eye Hospital) | Asp .NET Core ,Rest API , Sql Server

- Developed a centralized inventory management system for optical products, including lenses, frames, and accessories with CRUD operations and stock tracking.
- Designed and implemented RESTful APIs for inventory, billing, supplier, and customer management with secure role-based authentication.

### Invision Eye Care (Hellen keller Product) | Asp .NET Core ,Rest API , Sql Server

- Developed a healthcare management system for patient records, appointments, prescriptions, billing, and treatment history.
- Implemented RBAC, data validation, and optimized database design to support high-volume survey operations

### Content Generation (Content Generation Tool) | Chat-GPT API ,Asp.Net Web Core API , Sql Server

- Integrated OpenAI Chat API to build an automated question and content generation system.**
- Architected REST-based AI service integration with fault-tolerant error handling and rate-limit management, enabling scalable generation of 70+ multilingual questions with image support .**

### Tambola(Kitty Party App) | Blazor,SignalR ,Asp.Net Core API , Sql Server

- Built a real-time multiplayer **Tambola game using Blazor and SignalR**, enabling concurrent gameplay across multiple users.
- Integrated real-time state synchronization using SignalR hubs to ensure **low-latency updates.**

## Education

### B.Tech – Computer Science & Engineering /May 2020 – July 2024

Raj Kumar Goel Institute of Technology | CGPA : 8.06 / 10
